

USING THE NATURAL CATCH® PLUS FRUIT FLY TRAP

First...

Write today's date on the label and *pierce the top* of the Natural Catch® Plus with the enclosed stick. Incorporate the Natural Catch® Plus Fruit Fly Trap in displays of onions, bananas or tomatoes and wherever fruit flies may be a problem. The Natural Catch® Plus has convenience built-in. It is complete and ready to use.

Second...

Place Natural Catch® Plus Fruit Fly Traps *3 to 4 feet* apart through the display area. The environmentally safe attractant is pre-measured which produces predictable results. Typically, fruit fly populations are reduced 70% to 80% and more.

Third...

Inspect the trap entrance and keep free of debris. The trap has been designed to be long lasting, very low maintenance, and simple. Replace after 30 days.

Additionally...

The Natural Catch® Plus is safe for use around food. The container is FDA approved food grade material and is recyclable. The attractant is safe and completely non-toxic and pesticide free. The trap design prevents spillage in most orientations.
