

# Victor® TIN CAT®

## REPEATING MOUSE TRAP

- No Winding or Resetting
- Holds 30 Mice
- No-Jam Mechanism
- No Bait Required
- Hinged Lid • Low Profile

Place Tin Cat lengthwise against wall or object with entrance holes nearest that surface. No bait is required, but will sometimes increase catch.

Low profile Tin Cat goes where wind-up traps can't fit. Large entrance holes help capture the largest mice. Multi-viewing holes allow fast inspection.

Heavy gauge galvanized steel construction means long service. Submerge trap in water for quick disposal of rodents. Hinged lid permits easy cleanup.
